Office Action Summary

Art Unit: 3753

This action is responsive to the communication filed March 15, 2002.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species A: Figure(s) 1-2

Species B: Figure(s) 3

Species C: Figure(s) 4

Species D: Figure(s) .

Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, at least claim 1 appears to be generic.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M.P.E.P. § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

Art Unit: 3753

It should be noted that some of the species listed above may not currently be specifically claimed. However, such unclaimed species are listed at this time in the interest of expediting prosecution in that applicant may identify and elect **any** single disclosed species and to present claims drawn thereto. Moreover, there may be other species present than those listed above such as disclosed but unillustrated variations and applicant may also identify and elect such other species.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --  
(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. §102(b) as being anticipated by Williams. Williams shows a valve where the resilient head 19 is deformed as it is being forced past the seat 18 and then returns to its outset condition. Williams includes a rod 24 which extends to be used with a fill chuck, which is the actuator.

The Prior Art made of record and not relied upon is considered pertinent to applicant's disclosure.
